CIT

Collagen Induction Therapy (CIT), aka Micro Needling, is a new and innovative skin facial rejuvenation procedure taking the beauty industry by storm. It is a minimally-invasive non-surgical procedure for skin rejuvenation that involves the use of a micro-needling device to; reduce fine lines and deep wrinkles, hyper pigmentation, age spots, acne scars, stretch marks, hair loss and leads to improved volume, strength, resiliency, smoother texture and a brighter complexion to create healthier more youthful looking skin.

Collagen Induction Therapy (CIT)

Derm^{HD} Serums List

Collagen improves the texture of the skin, reduces wrinkles, and also balances the pigmentation caused by sun damage.

Applied Serum enters the skin through CIT micro channels.

Recovery Serum

The DermHD is all natural and organic. It has a high level of antioxidants and is a non-comedogenic oil-based formula that restores the lipid barrier, reducing dryness caused by premature aging.

Ingredients include:

- Emu Oil
- Green Tea Oil
- Panax Ginseng Root Extract
- Goji Berry
- Grapeseed
- Huang Qi

HA Serum

Hyaluronic Acid (HA) is a powerful humectant (aka moisture-binding ingredient) that keeps skin plump & hydrated & young-looking. Its present in large amounts in the spaces between skin cells, where it provides moisture, plumpness, firmness & suppleness.

Ingredients include:

- Hyaluronic Acid
- Sodium Ascorbate
- Zinc Gluconate

Boost Serum

It is formulated to boost collagen levels and restore youthful volume to skin that has lost its elasticity and firmness.

Builds new collagen and protecting it and its surrounding support matrix.

Ingredients include:

- Hyaluronic Acid
- Sodium Ascorbate
- Zinc Gluconate
- DMAE
- Magnesium
- Copper Gluconate
